TOWARD A POST-PANDEMIC WORLD

1

Beware the pedestal

Business has proven itself invaluable in the pandemic but can't solve all societal problems on its own.

2

Lean into comparative advantage

Business must make choices and lead where they have expertise—jobs, training, fair wages and innovation—and continue to take action on inclusion and sustainability.

3

Employees are job one

Business must prioritize employees, their most important stakeholder.

4

Government must lead on foundational challenges

Government involvement is essential on broad societal issues such as vaccination, return to workplace, privacy, income inequality and climate change.
